

Micro-Projet of Cloud Computing

To be returned one day before the consultation of marks of Cloud Computing (date de consultation des copies d'examen)

Create a web API with Python that contains the following endpoint:

- `create_embedded_pdf`: that embeds several PDFs in a given pdf
- `extract_embedded_pdf`: that extracts all embedded PDFs in a given pdf

All manipulated PDFs should be in binary format, not file format. The swagger should be used.
